

Release Notes 2015-09-10

Enhancements

- Kiosk - Ability to configure kiosk scanning images per kiosk (gives the ability to add the new graphics for each type of kiosk or keep the old graphics)
- Integration - Ability to update built-in demographics information to Athena
- Payment - Removed patient ID and name from emailed payment receipts for HIPPA reasons, leaving in the visit location and date/time stamp
- Eligibility - When Clearwave identifies an eligibility transaction that will fail due to the member ID received, Clearwave will show an alert in the portal that there is a member ID issue

Bug Fixes

- Provider Portal 3.0 - When a patient answers a multiple choice question on the kiosk with an "other" answer, users can print this custom form with no error
- Integration - When no payment is made at the kiosk, no CreditCardResponse message will be generated
- Integration - PrimeSuite will ignore CreditCardResponse message if no payment was made at the kiosk

Please contact support@clearwaveinc.com to enable any new features or enhancements

Scope of Release

The release will impact the Provider Portal 2.5, Provider Portal 3.0, Kiosk and Integration. The actual release should have minimal effect on user workflow.
