

Release Notes 2016-03-04

Enhancements

- **Integration** The number of appointment resources for an organization has been extended so as not to disrupt the system or cause delays in querying.
- **Kiosk Payment Processing** Instamed payment processor is now integrated with Clearwave.
- **Kiosk Payment Processing** OpenEdge payment processor is now integrated with Clearwave.
- **Provider Portal** Rules have been added for Tasks, Custom Fields and Final Step that will trigger when any payment, partial or complete, is made at kiosk.
- **Eligibility / Provider Portal** Eligibility transactions to payers that have not been properly set up now displays "Invalid login to payer site. Contact your system administrator" instead of "Could Not Verify Eligibility".
- **Eligibility** Enhanced connections will now display the outpatient copay.

Bug Fixes

- **Integration** Athena messages causing error messages have been resolved.
- **Provider Portal** Error messages when updating patient demographics from multiple choice/selection custom fields have been resolved.
- **Eligibility** Tricare specialist copays for specialist visits are now being displayed.
- **Kiosk** Organizations using the Swipe and Hold feature and not processing payments in certain situations have been resolved.

Please contact support@clearwaveinc.com to enable any new features or enhancements

Scope of Release

 The release will impact the Provider Portal 3.0, Kiosk and Integration. The actual release should have minimal effect on user workflow.
