

# Release Notes 2020-05

## Kiosk

- KioskMVC Virtual Console - Additional console to help troubleshoot Win 7 kiosk transactions.

## Tablet

- Windows Tablet with card image capture, non-encrypted msr, instamed dynamag - New Windows Application that can be run on a windows tablet. This has classic kiosk business logic, as well as image capture and payment processing capabilities.

## Portal

- Value Report Mobile Summary Data Fix - Change released to the Value Report to fix the Mobile Pre-check count discrepancy.

## Integration

- Memo Payments for NextTech - Disable Outbound Updates - toggle added to disable payment post to Nextech Select if the payment is a memo.
- Bi-directional Nextech Practice + integration

## EDI

- Carefirst BCBS: Update Specialist copay logic when STC 51 is sent in eligibility request

## EDI Changes:

Pacific Source Medicare Advantage- New Payer Added X12 Route

Scope of Release

The release will impact the Kiosk and Provider Portal. The actual release should have minimal effect on user workflow.
