

# Release Notes 2015-12-03

## Enhancements

- Provider Portal 3.0 - Ability to set Printable Custom Forms per registration location
- Provider Portal 3.0 - Multiple Choice Custom Field will be shown in Printable Custom Form
- Kiosk - Extended timeouts on certain kiosk screens to give patients more time
- Kiosk - Allow a patient to check in to a second appointment of the day after a "late/now show" for an earlier appointment
- Kiosk - The Korean language has been updated
- Reporting - EDI transactions will be available for Excel export
- Payment Processing - Greenway PrimeSUITE payment posting applies "BalanceDueForToday'sVisit" value as a "Copay"
- Intergy - Journal ID will be set by Service Location; Today's date will be input as Journal Posting Date for payment processing; consents can be sent outbound to Intergy

## Bug Fixes

- Provider Portal 3.0 - Editing rules on Custom Fields for Reason for Visit will show current selections while in edit mode
- Provider Portal 3.0 - Custom Form PDFs will include Demographics and Insurance information when sending to PrimeSUITE
- Kiosk - Gender will be asked at the kiosk if "Unknown" and kiosk will store answer
- Integration - Insurance Card images will be sent outbound with correct TIF doc type
- Integration - Consent JPEG outputs have been formatted properly
- Integration - The combined card images for Secondary and Tertiary insurances will always be sent as JPEG
- Eligibility - Resolved 500 error when viewing Eligibility and Benefits

Scope of Release

The release will impact the Provider Portal 3.0, Kiosk and Integration. The actual release should have minimal effect on user workflow.
